Classroom Management Software

LanSchool

Today's teachers are faced with the challenge and opportunity of using technology to teach. Computers and tablets are amazing educational tools, but the can also be a huge distraction to learning. The internet, instant messaging, email and games are a constant temptation for students.

Remove these distractions to teach more efficiently

No solution for classroom management is easier to install, use or adapt in a classroom with computers than LanSchool.

· Facilitates learning by allowing the teacher to show their screen to all student computers.

· Keep students focused on their tasks by the supervision of their screens through screen miniatures in real time.

· Call students attention by whitening their screens.

· Help students through the management of their screens by remote control and chat applications.

· Evaluates student understanding by the implementation of tests.
